

I travel over great distances for my work. I chose to subscribe to XM radio because of the types of programming they provide. Just recently they began a service of instant traffic and weather. This has been very valuable to me. Since I have a lot of business in one of the large cities covered by this service it has given me valuable information on traffic problems that may hinder me from arriving at appointments on time. This type of information is available through standard AM and FM stations, but not throughout the day the way XM provides. I may need to hear a report that is not available on another station at the moment I need to hear it. XM Radio gives me the info I need when I need it. Since I pay for these services I don't think the NAB should dictate what I am permitted to hear. I urge the FCC to reject the NAB's petition 04-160. I also urge the FCC to support XM Radio in providing the kind of programming I need and deserve. Thanks.
